

College Credit Plus “CCP”

February 12, 2024

What is College Credit Plus?

CCP: The Basics

- Replaced Post-Secondary Options Program (PSEO) during the 2015-2016 school year
- Ohio's College Credit Plus (CCP) program allows students in grades 7-12 to earn transcribed college credit and high school credit while still in high school by taking college courses from community colleges or universities.
- Created under Ohio Revised Code Section 3365.02: Section C reads as follows: *All public secondary schools and all public colleges shall participate in the program and are subject to the requirements of this chapter.*
- Over 76,000 were enrolled statewide in CCP programs last year

CCP: The Basics continued...

- Students may take up to a maximum 30 credit hours per year free of charge as long as the student passes the course(s). Additional hours are billed to the family.
- All tuition and required books/materials are covered by the local school district.
- CCP courses may be offered in the local school and taught by a qualified teacher.
- Each year, school districts and local colleges/universities enter in an agreement (MOU) for the following school year.

CCP: The Basics continued...

- Costs are set by the State for both a floor and ceiling amount
 - Current Tuition Rates
 - Floor: \$41.64 per credit hour - Typically used for CCP courses taught at AWHS by AWHS staff
 - Ceiling: \$166.55 per credit hour - Typically used for courses delivered at the college/university on online by college/university staff
 - Costs are outlined in annual MOU's if the college/university is charging a tuition outside of what is approved by the State

Typical AWLS Agreements

- Owens
- Bowling Green State University
- University of Toledo
- We have had a limited number of students take CCP courses at other institutions over the years

Improvements & Cost Cutting Measures

- Created a textbook inventory sheet to better track all books available, which university uses them, and when they were last checked out.
 - This helps eliminate duplicate book purchases, find books that we have, and allows us to better track book trends to assist with future purchase/rental decisions.
- Working on creating accounts and relationships with companies to facilitate the expanding need for digital content and software. For example:
 - We now have a “book store” account through VitalSource that allows for tax exempt digital access code purchases. (No longer need to pay taxes or order through the student’s account.)
 - We can now purchase “generic” MyLabs access codes for courses that require this software. We now pay \$52.47 per student access code instead of \$95 - \$130.
- Updated CCP website to remove university bookstore suggestion and to instruct students to place their orders through our online ordering form.
- Creating a short exit survey for Spring CCP students to find out if course materials were used, available for free, or provided by the instructor.
